

YASH RAVINDRA BAVISKAR
Course : **B.Tech**, Computer Engineering, 2026
Email : baviskaryash038@gmail.com
Mobile : 7058592819
Portfolio: <https://yash-baviskar.vercel.app/>

ACADEMIC DETAILS

COURSE	INSTITUTE/COLLEGE	BOARD/UNIVERSITY	SCORE	YEAR
B.Tech	COEP Technological University,Pune	COEP Technological University	6.74 (CGPA)	2026
DIPLOMA (IT)	Government Polytechnic Pune	Autonomous	90.87%	2023
CLASS X	St. Aloysius Convent High School,Bhusawal	Maharashtra State Board of Secondary and Higher Secondary Education (MSBSHSE)	89.2 %	2020
Subjects / Electives		Cloud Computing , Internet of things, software Engineering		
Technical Proficiency		Python, OpenCV , PyAutoGUI, Pytorch , React , Docker, Kubernetes, SQL ,Java, DSA, Arduino		
AI Tools		ChatGPT , Claude , Cursor , Github Copilot , BlackBox , Perplexity		

INTERNSHIP

Software Developer Intern : Globeminds Technology Pvt.Ltd
Developed Java Swing-based desktop applications with MySQL database integration, implementing efficient CRUD operations and user-friendly interfaces.

AI Engineer Intern: Progrentures Solution Pvt.Ltd
Developed and optimized AI-driven solutions using Python, SQL, and machine learning techniques. Contributed to the development of an AI-based personal assistant by implementing automation workflows, data processing pipelines, and intelligent features to automate tasks such as email, messaging, and social media interactions, improving user productivity and system efficiency.

PROJECTS

AI-Based Automatic Institute Class Scheduling System with Real-Time Chat Analysis
Developed an AI-based Automatic Institute Class Scheduling System that generates conflict-free timetables by analyzing constraints like faculty availability, classrooms, and subjects. Built using Next.js, Node.js, MongoDB, and Socket.IO, with Groq (LLaMA 3.1) for NLP-based scheduling assistance and real-time updates

AI-Based Attendance Management System Using Face Recognition - Artificial Intelligence
This project automates attendance marking using real-time face detection and recognition. It captures student faces, trains a model using the LBPH algorithm, and logs attendance in a database or CSV file for efficient management

CREO : AI Based Personal Assistant System - Automation
Creo is an AI-based personal assistant that leverages machine learning and automation to provide efficient and personalized assistance to its users. Creo is designed to perform both hardware and software automation, allowing users to focus on more important tasks.Creo can automate repetitive tasks, such as Sending email, Whatsapp messages, and telegram and other social media, reducing the workload for users.

POSITION OF RESPONSIBILITY

Chief Ambassador - Ignited Innovators of India
Helping students and early stage startups bring their innovative ideas to life. Responsible for coordinating with Eton professionals.

Head of E-yantra - Government Polytechnic Pune
Responsibility of managing the College groups for robotics competition organised by IIT Bombay

COMPETITIONS

Dipex State Level Project Competition
Won 1st prize under the theme Industrial Automation in a State level Exhibition of working model.

LANGUAGES KNOWN

English (Professional) , Hindi (Fluent) , Marathi (Native)
